EDUCATION

M.S. DATA SCIENCE & ANALYTICS
Georgetown University
Aug 2023 – Dec 2024 · GPA 3.95 / 4.0

B.S. BIOMEDICAL ENGINEERING
Boston University
Sept 2019 – May 2023 · GPA 3.5 / 4.0
Dean's List of Academic Honor

SKILLS

PROGRAMMING
Python · SQL · R

DATA & CLOUD
Databricks · BigQuery · GCP · PySpark · Spark

ML & ANALYSIS
PyTorch · Scikit-Learn · Pandas · NumPy

STATISTICS
A/B Testing · Causal Inference · Hypothesis Testing · ANOVA / T-tests · Time Series Forecasting · Regression · Cross-Validation · Model Evaluation

TOOLING
Git / GitHub · GitHub Actions (CI/CD) · CLI / Shell

SPOKEN
English · Mandarin (Conversational)

PROFILE

Data scientist with an M.S. in Data Science & Analytics and a biomedical engineering background, working end-to-end from raw data through modeling to the services that put results in front of users.

Away from the desk: rock climbing, traveling, and gaming (rogue-like, FPS, and ARPGs). Also an active interest in quantitative finance.

WORK EXPERIENCE

DATA SCIENTIST
Albertsons Companies Inc. Dec 2024 – Present

- Own a large portion of the promotional planning data flow, connecting raw data sources, model outputs, and final forecasted decisions within a merchandising platform that automates work for 400+ store managers and is projected to save the company \$400M.
- Implemented an LLM solution automating promotional execution, eliminating 3 weeks of manual labor per cycle.
- Orchestrate Lakeflow pipelines over petabytes of multi-decade retail data (transactional, hierarchical, allowance, geographic) feeding downstream forecasting models.
- Built API backend services delivering ETL and model outputs to the platform, powering promotional scenario building, execution, change logging, and model explainability features.
- Partner with 5+ cross-functional teams spanning business analysts, modeling, promotion execution, frontend, and offshore engineering.

Stack Databricks (Lakeflow, Apps, AI/BI, Genie) · PySpark · BigQuery · GCP · Python · SQL · LLMs · API Development

DATA ANALYST
Data Annotation Tech May 2024 – Dec 2024

- Engineered code-related prompts for LLM training and evaluated chatbot responses for accuracy, reasoning, and coding quality.

Stack Python · Prompt Engineering · RLHF · LLMs · Error Analysis

STUDENT RESEARCHER / INTERN
Dana–Farber Cancer Institute / Harvard Medical School May – July 2022

- Profiled synthetic protein degraders via functional proteomics and genomics, supporting discovery of molecular glues that kill cancer cells.

Publication Co-author, *Nature Chemical Biology* · 10.1038/s41589-024-01668-4

PROJECTS

Skin Cancer Detection — Image & Tabular Data [GitHub](#)

- Classified malignant vs. benign skin lesions from 3D total-body images and tabular data using CNNs and gradient-boosted trees; achieved >90% accuracy.
- Countered severe class imbalance with under/over-sampling and ensembled model predictions across architectures.

Stack PyTorch · CatBoost · LightGBM · ResNet · EfficientNetB4 · Ensembling · Cross-Validation · pAUC
